TABLE OF CONTENTS

GENERAL SESSIONS *Page*

Keynote Address—Innovation and Enterprise
Ross W. Hammond 3

The Future of Machine Tool Automation—A Laboratory Sneak Preview of the Expected Transition from N/C to D/C
David D. Bedworth 8

Presentation and Dissemination of Training Information
George L. Dickey and Stephan A. Konz 20

A Rational Basis for Normal in Work Measurement
Mitchell Fein 28

The Development of a Complete Multiproject Scheduling System Using a Forecasting and Sequencing Technique
Larry G. Fendley 35

A Method for Measurement and Analysis of Supervisory Work
John M. Geisel 46

Integrating the Efforts of Consulting and Corporate Industrial Engineers
Jerry L. Marchbanks and Richard J. Jauregui 57

The Banking Explosion—A New Challenge for the Industrial Engineer
Lowrie W. McIntosh 62

Skills Inventory System Utilizing the Optical Coincidence Principle
Robert H. Noble 68

AEROSPACE

The Industrial Engineer and His Company's Long-Range Facilities Plan
Carl J. Kiefer 77

ENGINEERING ECONOMY

Some Practical Considerations in a Study of a Large Vehicle Operation
John H. Braden 89

Decision Tree Methodology in Capital Project Evaluation
John R. Canada 94

GOVERNMENT

Department of Defense Experience in Data Processing for Business Applications
A. T. Bishop 103

The Industrial Engineers' Role in Productivity Improvement—Aircraft Maintenance
Brandon O. Clarke 107

Industrial Engineering in the Air Force Logistics Command—Overview, Problems, and Prospects
Karl Merrill 112

HOSPITAL INDUSTRIAL ENGINEERING

Hospital Staffing Methodologies—Concepts, Development, and Uses
Karl G. Bartscht 119

Optimal Quantities for Hospital Supply Groupings
Richard M. Bramblett 129

A Simulation Model of a Saturated Medical System
John L. Colley, J. B. Hallan, and A. H. Packer 138

Fiscal Controls for Hospital Departments
Tee H. Hiett 156

A Study of Measuring the Quality of Patient Care
Gerald Nadler, George Huber, and Vinod Sahney 164

Industrial Engineering in the Rehabilitation of the Handicapped
E. R. Tichauer 171

INDUSTRIAL AND LABOR RELATIONS

Work Measurement Is Professional Activity
Bertram Gottlieb 183

Grievance Arbitration and the Industrial Engineer
Ralph Presgrave 194

MANAGEMENT

Industrial Change—Challenge and Opportunity
W. D. E. Anderson, R. W. Quirk, P. G. Turner, and N. C. Fletcher 201

The Industrial Engineer as Manager
Delmar W. Karger 210

Management by Results
Dale D. McConkey 215

OPERATIONS RESEARCH

Multiproduct Distribution with Common Warehouses
Hugh E. Bradley 227

Judgment and Probabilistic Mathematical Models as Illustrated by an Evaluation of a Proposed Mobile Radio Telephone Service
Irwin W. Kabak 232

The Future of Operations Research and Industrial Engineering
Ferdinand F. Leimkuhler 240

A Dynamic Programming Procedure for Locating Inspection Stations
Glenn F. Lindsay 244

Operations Research and Industrial Engineering
Robert W. Newsom, Jr. 249

Operations Research in the Solution of Air Traffic Control Problems
Matthew Rosenshine 253

Manufacturing Planning Using Simulation
Felipe K. Tan and John M. Burling 261

PLANT LAYOUT AND MATERIALS HANDLING

Criteria for Investment in Handling Systems
James M. Apple 269

CORELAP—COmputerized RElationship LAyout Planning
Robert C. Lee and James M. Moore 274

Automated Layout Design Program
Jerrold M. Seehof and Wayne O. Evans 281

QUALITY CONTROL

Single Sample Attri-Vari Plans for Item-Variability in Percent Defective
John H. K. Kao 291

TRANSPORTATION

Simulation of Public Transportation Operations
James J. Browne 301

VALUE ENGINEERING

Value Engineering in the Industrial Engineer's Future—Threat or Opportunity?
Stanley R. Kalin and R. Glenn Woodward 309

ORGANIZATION—PROGRAM PARTICIPANTS

Institute Officers, 1966–67 315

Conference Organization 316

Host Chapter Officers 316

Program Participants 317
